

Divided Legs  
Reclined Position  
Head Support

The Highback Plusline Sling is a high back model with reinforced divided leg parts. It has a generous overall width to offer a stretched seating position that is well-suited for heavier patients. The reclined seating offers a balanced weight distribution and the combined Polyester/Polyester Net fabric makes it easy to use and apply.

#### Comfortable Seating

The Highback Plusline features reinforced and divided pressure relieving leg parts as well as a reinforced head support. Combined with the generous overall width of this sling, it makes the Highback Plusline an extremely comfortable sling to use. The reclined position evenly distributes weight throughout the sling ensuring that the user does not experience any discomfort during the lifting process.

#### Bariatric Capacity

The Highback Plusline is designed to lift patients of up to 318kg/701lb. Although this sling can be used with both 2-Point and 3-Point suspension, it is recommended that

4-Point suspension is used as it provides a stretched seating position that is well-suited for heavier patients.

#### Easy Care and Easy Fit

Our slings are manufactured to the highest quality standards. They feature reinforced straps and high strength nylon webbing around the sling to make them strong enough to resist even the most active use. Each sling label is colour coded to ensure quick and easy selection of the correct sling and the straps are colour coded for easy determination of required positioning.
