

Alpha Transfer Aid Merlin & Alpha Support Belt Merlin

Alpha Transfer Aid Merlin

Alpha Transfer Aid Merlin is a simple and safe aid for assisting people with restricted mobility to stand up and change position. It enables carers to transfer clients in an easier, energy-saving and back-friendly manner and it can also mobilise the remaining strength in the client's arms and legs, if applicable, and also give them a feeling of security.

The ingenious design in conjunction with the smooth-running rollers allows a particularly safe and easy handling of the Alpha Transfer Aid Merlin. The use of high-quality, rust-free stainless steel also allows maximum stability even in extremely humid environments, for instance in and out of showers.

Alpha Support Belt Merlin

Alpha Support Belt Merlin assists with the support of a client for sitting and standing, or moving into a wheelchair, onto the toilet or a chair. Alpha Support Belt Merlin helps the caregiver control the movement of transferring a client of size, very effectively as well as unstable or nervous clients who can be held more securely, this way anxious clients are given a sense of security with help of the belt.
